Igor Vokoun - Software developer

Belgrade, Central Serbia - vokounigor@gmail.com - (+381)638691827 - in/vokounigor - igorvokoun.com

SUMMARY

- Full stack Software Developer residing in Serbia with over 5 years of experience, specializing in TypeScript, React, Vue and Node.js.
- Experienced in the full development lifecycle of complex applications with a focus on team collaboration, application performance and future maintainability.
- Committed to continuous improvement through collaboration, learning from others, and staying up to date with industry best practices by reading and researching to enhance code quality and development skills.

EXPERIENCE

Software Developer

Appklusiv Gmbh   **Feb 2023 - Present, Remote**

- Created an internal Node.js tool for generating over 40 PDF reports in 4 different languages, resulting in a monthly time savings equivalent to approximately one week for the company.
- Dockerized and helped build a Typescript Express and React web application which severely reduced the amount of time and complexity required to open new customer portfolios and manage existing ones.
- Improved a React Native mobile application by refactoring code and updating dependencies, enhancing responsiveness and reducing the app size by 10%.
- Built a Typescript Express and React application for scanning images of documents by using Google's Tesseract OCR (optical character recognition) library leading to a significant decrease in incorrect data input by users being inserted in our Mongo database.
- Upon hitting a bottleneck with npm in our monorepo project, ensured a smooth transition to yarn for managing workspaces and project dependencies and updated appropriate CI/CD pipelines.

Software Developer

Yettel   **Oct 2019 - Feb 2023, Belgrade**

- Lead a team of 5 to develop "Yettel Zelene Staze" - a SPA developed with React and Node.js which helped establish Yettel as one of the more Eco-friendly companies.
- Became a lead Vue developer by architecting and creating Yettel PWA allowing users to manage their phone data package through a browser, resulting in a 40000 monthly active users increase for the company.
- Helped with implementing a Redis caching layer in our Slim PHP REST API resulting in a significantly faster server response time and leading to the Yettel mobile app being the highest rated telecommunications app on Google Play store in Europe for a time.
- Managed and maintained a legacy PHP application, resolving issues and ensuring stability, as well as writing documentation to allow easier onboarding of new developers.

EDUCATION

Bachelor's degree in Economics

Minor in Informatics • Faculty of Economics and Business, University of Belgrade • Belgrade, Serbia • 2020

CERTIFICATIONS

EFSET C2 English Certificate

EF SET • 2023 • Demonstrated C2 proficiency in English reading and listening skills.
